

*Calculation method.* Unless another method is specified in the schedule, each license shall be calculated by multiplying the licensee's gross receipts for the prior year by the scheduled rate, using the following regression table which shows the percent of the license rate to be applied to gross receipts:

100 percent, to 1st million dollars or portion thereof.

80 percent, to 2nd million dollars or portion thereof.

60 percent, to 3rd million dollars or portion thereof.

40 percent, to 4th million dollars or portion thereof.

20 percent, to all amounts in excess of 4 million dollars.
