

SUPPLEMENTAL BID ADDENDA

The below is a Supplemental Addenda as it concerns provisions of the Request for Proposals, General Specifications and Contract Documents for storm debris removal services issued by the City of Saraland, Alabama on July 22nd, 2022. Based upon written questions provided by prospective bidders, the City of Saraland provides the following clarifications and supplementations to the RFP as follows:

1. The Request for Proposal documents discuss a certification regarding lobbying the form. No such form is included with the bid documents. The executed form is not required with submittal. The selected vendor will be provided a lobbying form to be submitted prior to execution of the underlying contract.

2. The bid documents do not discuss the amount of copies of the proposed bid to be submitted with the original bid proposal. Vendors are requested to provide the original and five (5) copies of the bid response.

3. As a point of clarification concerning language for payment and performance bonds, all bonds and certificates of insurance are to be provided within forty-eight (48) hours following an activation via a Notice to Proceed to the awardee.

4. A request for clarification has been requested concerning temporary debris management sites. Debris removal operations will allow for clean and vegetive debris (logs, limbs and leaves) to be staged/reduced at a temporary debris management site. C & D debris should be priced as a direct haul to a properly permitted landfill.

5. As a point of clarification, the "unit price" for items numbered 10 through 13 should be priced per tree. Similarly, item number 34 should be priced per tree as well.
